

Ballast Connect Micro 2X 600

TechGrow's Ballast Connect Micro is a digitally controlled relay controller that can switch up to 2 x 600W. Each outlet is individually switched by hybrid relays.

Thanks to the digital control and the 2 relays, this controller has a lot to offer. For example, the Ballast Connect Micro has temperature protection and the relays switch on every 5 seconds during switching time.

This controller comes without Temp Probe.

Features

- Suitable for 2 x 600W
- Silent switching
- Lamps are switched individually
- 2 digital clocks (24-hour/asymmetric)
- Adjustable temperature protection
- In case of overheating one lamp is switched off
- Adjustable switch-on delay up to 300 minutes
- All settings are saved in the event of a power failure
- Display of minimum/maximum temperature
- Various Temp Probes are available separately (not included)

Technical specifications

- Power supply: 100 to 240V
- Mains frequency 50 to 60 Hz
- Own Consumption: 3W
- Fuse: 1 x 10A
- Switching capacity: 1200W / 10A
- Switching capacity per outlet: maximum 4A
- Power cord: 3 x 1.5mm
